BUILDING EFFECTIVE SOLIDARITY

Israel is planning the end game - the complete ethnic cleansing of the whole of Palestine.

Israel is escalating its massacres in Gaza and attacks across the West Bank. Israel is designating Rafah as a concentration zone under the sick label of "humanitarian corridor."

Children are starving to death in Gaza due to blocked aid and targeted food distribution points. Civilians attempting to access food are being ambushed and killed in huge numbers.

The West Bank is seeing a surge in settler violence, with Palestinian homes and lives under daily threat.

The RAF has flown over Gaza at least 518 times during the genocide, providing intelligence to the Israeli military below.

Despite the scale of the atrocity, UK political and institutional leaders remain largely silent. Labour leader Keir Starmer has expressed support for Israel's actions, and Scottish First Minister John Swinney - along with the vast majority of elite UK institutions - has refused to condemn the violence.

In response, the Gaza Genocide Emergency Committees are calling a mass protest in Edinburgh on Saturday, July 19th, calling for:

- An immediate ceasefire and the entry of UN food and medical aid
- An end to UK military involvement
- An end to Israel's systematic and targeted campaign of ethnic cleansing
- The Scottish Government to support the South African case against Israel at the ICJ

YOU can make a difference - see you in EDINBURGH!
